

Re: Resistant Lining Ltd.

I have known and worked with Richard Lamoureux and his crews for over the last seven years.

Resistant Lining is reliable, getting the job done effectively and efficiently. They are well organized and work well as a team. Their quick turnarounds save us time and money. I estimate that Resistant Lining and his team save us 10% in turnaround time which in our business is big dollars.

Their quality of workmanship is unsurpassed in this industry. They are often requested by our clients as their preferred coating company as well. Resistant Lining also show due diligence in the safety area and have a perfect safety record while performing sandblasting and coating on our sites.

They are experts in the field and are particular about doing a good job, down to every detail, and that is why we rely on them.

Resistant Lining Ltd. is our supplier of choice when it comes to quality coatings.

Yours truly,

Dave Reykdal
